

Seminario

Venerdì 19 Aprile, ore 11:00

Aula 3, Piano II – Palazzo delle Scienze

Statistical indicators: approaches and methodology for their synthesis

Filomena Maggino

Università “La Sapienza” di Roma

Abstract – The seminar aims at disentangling some important methodological aspects and issues that should be considered in measuring complex social phenomena through indicators and in dealing with those indicators in order to construct syntheses. As we will see, not only in constructing but also in synthesising indicators different aspects are involved, technical, conceptual and logical.
